2020 Decking Balustrade & Porches Collection

Decking

Porches, Gallows & Pineboard

We have everything you need,
available from your local distributors.

Decking Balustrades made to perfectly complement your outdoor spaces

Our Outdoor Range

We have designed and developed our range of decking balustrades to perfectly complement both your garden and your home. Designed to work with your decking, the balustrade systems have been created to be easy to install, long lasting, stylish and beautiful.

Core Deck

The Core Deck range features all timber components in a variety of styles. From the simple modern Stop Chamfered or Square Softwood to the traditional Turned Softwood or American Softwood, the Core Deck range comes in designs and fixing methods to complement any home.

Stop Chamfered Softwood	04
Turned Softwood	05
Square Softwood	06
American Softwood	07

Iron Deck

The new combined Iron Deck range has been developed to give a completely different look and feel to our other systems. Utilising a mix of wood and metal the Bow and Eden aluminium ranges feature modern styled spindles to give individual balustrade solutions. The Tuscany and Traditional designs both feature steel spindles in classic designs.

Bow	08
Eden	09
Tuscany	10
Traditional	11

Clear Deck

Clear Deck features either wood or aluminium rails and uprights and mixes them with high quality glass infills to give a modern contemporary style perfect for the consumer who wants something different.

Decking Balustrades - made to last

Regulations & Standards

All of our systems have been independently tested to conform with all the relevant Building Regulations in the UK. The systems all conform to BS6399 - Part 1 1966, Loadings for Buildings, our systems all conform to the latest EU standards. You can be certain when you install or specify Cheshire Moulding Balustrade systems they conform to all the latest standards - for full details please see our trade brochure or website.

Cheshire Moulding are also proud to be full members of the Timber Decking and Cladding Association. This organisation gives expert advice and guidance to ensure high quality decking and associated structures. Our products are also Deck-Mark and Deck-Mark Plus certified to ensure we comply with the latest ISO guidelines.

Cheshire Mouldings also fully support and are able to supply FSC® certified products from responsibly managed forests. We are also able supply PEFC certified products from sustainable forests. Details of which products are certified under each scheme are listed in this brochure. We use FIRA to test our products to the relevant standards.

Timber Pre Treatments

Softwood outdoor balustrade components are treated to make them last for 15 years. They are pressure treated with Celcure AC - 500. Initially, this has a green appearance, but it weathers to a honey brown before eventually fading to grey. It can be painted or stained to match any outdoor colour scheme.

Treatment & Maintenance

All balustrade components should be treated annually with a seal, stain or oil treatment. For all balustrade components, hardwood or softwood, follow carefully the seal, stain or oil recommendations of the manufacturer and test on an off-cut or hidden surface.

Use a cloth, slightly heated water and a mild detergent for items such as glass and alloy posts or rails. Do not polish or employ abrasive cleaners and scourers.

Softwood

As standard, timber decking materials from Cheshire Mouldings are made from softwood Scots Pine. There is a natural tendency as the timber weathers for there to be minor surface checking and splitting, caused by the variation in moisture content and the effects of wetting and drying out. These surface defects do not harm the decking structure.

As with balustrades, decking should have a proprietary clear water repellent, semi-transparent seal or decking oil applied, for the sake of protection and enhancement. Make sure that the decking is dry before you start. Test by sprinkling drops of water over the surface and if the wood does not absorb the moisture let it dry out and retest before carrying out the work.

Note that newly-laid decking should not have any finish applied until it has weathered properly.

Add an end-seal preservative to any surface that has been exposed by drilling or cutting.

FSC® certified products available upon request.

The mark of responsible forestry

A photograph of a light-colored wooden door with a vertical grain and a small decorative window. The door is set within a white frame and is covered by a dark grey, shingle-style canopy supported by white brackets. To the left of the door is a large black pot with a green bush. To the right is a smaller white pot with a green plant. A stone path leads to the door. A wall-mounted light fixture is visible on the right wall. The overall scene is bright and clean.

Porches and canopies to transform any door

Our range of beautiful porches, ranging from the simple Flat Roof to the Apex Canopy, have been developed to be both easy to install as well as long lasting and durable. All components are pre-drilled ready to screw together and ready to paint, stain or varnish to complement your décor. The simple way to add style to your home.

Flat Roof Canopy

These stylish porch canopies and accessories will transform the exterior of any home.

Flat Roof Canopy (Pine)

CODE	SIZE (mm)	QTY.
